

## PRODUCT INFORMATION SHEET

### Tube cutter

#### Product description

The cutter made of durable aluminum alloy is designed for cutting plastic tubes, e.g. PVC, PP-R, PE, PEX / AL. It is perfect for installation work which requires precise perpendicular cutting. V-shaped blade made of sharp and durable SK5 steel cuts the tube gradually, reducing the pressure on its walls, which prevents it from flattening and deforming during cutting. A quick-change blade mechanism enables the cutter to be serviced, extending its life time.

#### Characteristics

- blade with hardness of 53 HRC made of SK5 alloy steel;
- body made of aluminum alloy;
- V-shaped blade, which presses the tube at points and cuts it gradually, thus reducing its deformation;
- quick and tool-free blade change;
- keeps an even and unjagged edge of cut material;
- lightweight and comfortable;
- contoured handle, with a specially shaped surface, enabling comfortable grip and operation of the tool.
