

PRODUCT INFORMATION SHEET

Magnetyczny uchwyt bitów 1/4 hex 65 mm

Product description

Bit holder designed for work, among others, with 1/4" screwdrivers and impact wrenches.

Socket for 1/4 HEX bits.

The body is made of high-quality chrome vanadium steel and the bit socket is made of stainless steel to cope with heavy loads.

The composition of the metal from which the tool is made makes it more resistant to torsion when transmitting force to the screw, which means that it can work with higher torques.

The technology of heat and mechanical treatment makes the holder flexible enough to absorb the impact.

Strong magnet holds the bits securely in the holder.

Easy and secure bit mounting in the "One Touch Bits Holder" system.

Characteristics

- Holder size – 1/4 HEX;
- Socket size – 1/4 HEX;
- Length – 65 mm;
- Material – CRV&Stainless;
- Hardness - HRC 50-56;
- Magnetized socket.
- Mounting - "One Touch Bits Holder".
