

PRODUCT INFORMATION SHEET

Wood saw blade 20x40 mm, teeth 1.4 mm

Product description

The blade is designed to be fitted to a multitool, such as the HT2E230-0MT. It can be used for cutting wood and wood-based materials, plastics and plasterboard. The blade material provides flexibility and resistance to damage. The narrow width of the blade allows it to be used in hard-to-reach or small areas and for plunge-cutting. The universal attachment of the working tip fits most multitools on the market.

Characteristics

- intended for: wood, wood-based materials, and plastics.
- blade width - 20 mm;
- blade length - 40 mm;
- tooth size - 1.4 mm;
- material - high carbon steel, HCS/SK5
