

## PRODUCT INFORMATION SHEET

### Workshop mare

#### Product description

Adjustable, foldable, heavy-duty work trestle for job-related versatility. The 9-level height adjustment, allows the tool to be ergonomically adapted to varying needs. The 2 trestles form the structure for the mobile work table. They are equipped at both ends with scantling/lattice supports, using which a stable structure can be built for the worktop using two trestles, sold separately. The brackets can be infinitely adjusted from 40 mm to 90 mm to accommodate different sizes of scantlings. For full stabilisation of the work table, the OSB top, for example, can be connected to the scantling with screws. All in all, this allows additional workspace to be arranged anywhere. 530 kg maximum load of a single support, allowing massive objects to be handled. When setting up a work table, pay attention to the load-bearing capacity of the tabletop itself. The foldaway leg supports allow you to place small cross-sections of squared timber/slats/beams or almost vertical OSB or plasterboard on them. Thanks to individually adjustable legs, the trestle stands stable even on uneven surfaces. A non-slip surface ensures that workpieces or the tabletop will slip. For full stabilisation of the work table, the OSB top, for example, can be connected to the scantling with screws. Foldable design gives the tool a compact size, making it easy to store, and the light weight and handle, transport. The heavy-duty steel used in the construction of the shuttle, with powder-coated and galvanised surfaces, guarantee the tool's durability.

#### Characteristics

- Size: (108,8-115) x (52-69) x (61,5-82) cm.
- Working height range - 61.5 - 82 cm.
- Bracket spacing range - 40 - 90 mm.
- Maximum load capacity: 590 kg.
- Weight: 9.6 kg.
