

PRODUCT INFORMATION SHEET

Professional vacuum cleaner with automatic filter cleaning function 30 l AS

Product description

The device features a filter cleaning system – a shaker. As soon as the vacuum cleaner's suction power decreases, the automatic cleaning system activates the shaker to restore the device's maximum suction performance.

A wireless remote control starts the device and adjusts the suction power without the need to reach for the control panel. Wireless control of the vacuum cleaner is possible once position "I" is selected on the panel switch.

The device is designed for collecting wood and concrete dust, chips, sawdust, small construction debris, and other waste generated during woodworking or the processing of other materials.

It enables cleaning of both dry and wet surfaces. The liquid extraction function allows hassle-free collection of up to 15 litres of liquid from, for example, workshop floors.

It is powered by a durable and powerful 2000 W motor, which generates effective suction for removing heavy dirt and debris.

It features a built-in socket for powering corded power tools. It works perfectly with tools equipped with a dust extraction system.

The container accommodates 30 L bags. A reusable textile bag is included in the set.

The vacuum cleaner is lightweight and handy, making it easy to move and store. Swivel wheels with brakes allow easy manoeuvring, while the handle ensures convenient carrying.

Characteristics

- Type of operation — dry, wet, with bag, bagless
- Additional functions — automatic cleaning, shaker
- Power – 2000 W
- Voltage – 230 V
- Fabric bag capacity – 30 L
- HEPA filter
- Wheels — yes, with brake
- Airflow – 2.1 m³/min
- Suction hose length – 2 m
- Power cord length – 4 m
- Weight – 14 kg with accessories
- Set contents:

vacuum cleaner;
antistatic flexible hose;
telescopic tube;
narrow nozzle;
wide nozzle;
fabric bag;
remote control;
HEPA filter;
adapter for power tool dust extraction cover.
