

PRODUCT INFORMATION SHEET

Hydraulic jack 1.5T, aluminum, 85mm - 370mm

Product description

This lightweight, aluminium, compact low-profile hydraulic “frog” jack is designed for lifting loads of up to 1,5 tonnes to a maximum height of 370 mm.

An automotive jack designed specifically for vehicles with a lowered suspension – it fits under sills as low as 85 mm.

With its heavy-duty construction and robust hydraulic cylinder, it lifts a vehicle quickly and effortlessly, with minimal risk of accidental lowering.

Heavy-duty front transport rollers and rear swivel castors provide easy manoeuvrability and stable positioning anywhere.

An integrated overload valve prevents exceeds the maximum lifting capacity, contributing to extended service life. Constructed with robust welds, the jack ensures durability even under intensive use.

Its lightweight design, compact dimensions and carrying handle make it ideal for transportation, for example, in a car boot.

Characteristics

- Minimum lifting height: 85 mm.
- Maximum lifting height: 370 mm.
- Maximum load capacity: 1500 kg.
- Weight: 12 kg.
- Construction material: aluminium
